RT "Amino acid sequence of the Fv region of a human monoclonal IgM
RT (protein MEA) with antibody activity against 3,4-pyruvylated galactose
RT in Klebsiella polysaccharides K30 and K33.";

CC -!-MISCELLANEOUS: This chain was obtained from a monoclonal antibody
CC against 3,4-pyruvylated galactose and isolated from a patient with
CC waldenstrom's macroglobulinemia.

## AAY52755;

26-JAN-2000 (first entry)

Anti-tissue factor mouse monoclonal antibody ATR-2 H chain V region.

Human tissue factor; TF; humanised; antibody; mouse monoclonal antibody; ATR-2; ATR-3; ATR-4; ATR-5; ATR-7; ATR-8; thrombotic disease; DIC; disseminated intravascular coagulation; immunogenicity; chimeric.

# Synthetic.

WO9951743-A1

Sato K, Adachi H, Yabuta N;

N-PSDB; AAZ33006. WPI; 1999-620204/53.

Humanised antibody recognizing human tissue factor, used for treatment disseminated intravascular coagulation.

Claim 1; Page 274; 291pp; Japanese.

containing the variable region of the H chain of a mouse monoclonal Ab recognising human tissue factor (hTF) and the constant region of the H chain of a human Ab. The variable region is one of six specified sequences (which are the H chain variable regions from mouse monoclonal Ab's ATR-2,3,4,5,7 or 8). Also described are chimeric Ab light (L) chains containing the variable region of the L chain of a mouse monoclonal Ab recognising human tissue factor (hTF) and the constant region of the L chain of a human Ab, the variable region being one of six specified sequences (which are the L chain variable regions from mouse monoclonal Ab's ATR-2,3,4,5,7 or 8). The chimeric Ab's can be used for the treatment The present invention describes chimeric antibody (Ab) heavy (H) chains

containing the variable region of the H chain of a mouse monoclonal Abrecognising human tissue factor (hTF) and the constant region of the H chain of a human Ab. The variable region is one of six specified sequences (which are the H chain variable regions from mouse monoclonal Abrecognising the variable region of the L chain of a mouse monoclonal Abrecognising human tissue factor (hTF) and the constant region of the L chain of a human Ab, the variable region being one of six specified sequences (which are the L chain variable regions from mouse monoclonal Abrecognising human Ab, the variable region being one of six specified sequences (which are the L chain variable regions from mouse monoclonal Abrecognising human Ab, the variable region being one of six specified sequences (which are the L chain variable regions from mouse monoclonal Abrecognistic of the mouse monoclonal abrecognistic of the mouse monoclonal antibody but greatly reduced immunogenicity.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    and prevention of thrombotic disease, especially of disseminated intravascular coagulation (DIC). The humanised antibody has the high high binding activity of the mouse monoclonal antibody but greatly reduced immunogenicity. AAZ33001 to AAZ33091 and Y527007 to AAX52767 represent sequences used in the exemplification of the present invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    WO9951743-A1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      disseminated
